(585) 797-5153 | kc681269@gmail.com | Rochester, NY | linkedin.com/in/k3vnc | github.com/kvn8888

## EDUCATION

### Rochester Institute of Technology

*Bachelor of Science in Software Engineering*

Rochester, NY

*Expected May 2027*

- **Cumulative GPA: 3.18**
- **Dean's List: Spring 2023, Spring 2025**
- **Relevant Courses:** Eng Cloud Software Systems, Software Testing, Engineering of Enterprise Software Systems, Engineering of Software Subsystems (Embedded), Software Process & Project Management, Web Engineering, Software Development and Problem Solving 1 & 2 (Python, Java, Git)

## CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services, 2025

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, C, C++, C Sharp, SQL, Bash.

**Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS.

**Backend:** Node.js, Express.js, Flask, .NET, REST APIs, OAuth 2.0, JWT.

**Databases:** MongoDB, PostgreSQL.

**Dev Tools:** Git, GitHub, GitHub Actions, GitLab (CI/CD, Runner), Docker, Docker Hub, VS Code, Postman, cURL, Vim, Jest, JUnit, Pytest, Unix/Linux.

**Cloud & Infra:** AWS (Lambda, EventBridge, SNS, Comprehend, EC2, S3, CloudWatch, IAM), Terraform, Vercel.

**Other:** Apache HTTP Server, Selenium, JSON, XML, Agile Methodologies, Scrum

## PROJECTS

### Stock Sentiment Tracker | AWS, Terraform, Boto3, Python, GitHub Actions, Git | Cloud Engineering Course Project 2025

- Architected and co-developed a serverless sentiment analysis platform for stock discussions with a team of four, reducing manual research time for users.
- Programmed AWS Lambda functions using Python (Boto3) to perform sentiment analysis with Amazon Comprehend, optimizing logic to reduce redundant API calls and improve data processing speed.
- Implemented an automated notification system using EventBridge and SNS, delivering daily email alerts to users for their subscribed tickers.
- Authored Infrastructure as Code (IaC) Terraform scripts to provision and manage all cloud infrastructure (EventBridge, Lambda, SNS, IAM), enabling 100% reproducible environments and cutting down deployment time by 90%.

### Azure Function & CI/CD | Terraform, Azure, GitHub Actions, Node.js | Personal Project 2025

- Engineered and deployed Azure Function App infrastructure using Terraform for a Node.js serverless application, fully managed via Terraform Cloud for state consistency.
- Built a complete CI/CD pipeline in GitHub Actions that automated infrastructure provisioning, cutting manual deployment steps by 100%.
- Diagnosed and resolved complex deployment blockers, including Azure regional quotas, Terraform provider bugs, and state file conflicts, leading to a 100% success rate for subsequent deployments.
- Authored detailed documentation on the troubleshooting process, establishing best practices for managing cloud resource limitations and provider-specific versioning issues.

### Enterprise Application Project | MERN Stack, Recharts, Jest | Enterprise Engineering Course Project 2024

- Collaborated with a team of four to design and develop a full-stack MERN application to meet specified corporate and departmental business requirements for a simulated enterprise.
- Built and rigorously tested a secure RESTful API using Node.js and Express.js, featuring over 12+ endpoints for full CRUD functionality. Achieved 95% unit test coverage with Jest.
- Developed a responsive React client, enabling users to filter, edit, and visualize data.
- Managed the deployment of the full MERN stack to an Ubuntu server, configuring Apache HTTP Server as a reverse proxy to the Node.js/Express.js backend.
- Integrated and debugged an analytics dashboard with Recharts to provide data-driven insights, visualizing key metrics like sales trends and employee performance which informed strategic decisions in project reviews.
